

Bago University
Department of Geography
Second Semester Examination, September, 2019

First Year (B.A)
(Geography Specialization)

Geog.1103
Climatology
Time allowed (3) hours

Answer any FIVE questions. Illustrate your answer with sketch maps and diagrams wherever necessary.

1. Explain the earth as a planet.
 2. Write about the atmospheric controls that cause variations in the atmospheric elements.
 3. Make a presentation on Vertical Distribution of Temperature in atmosphere.
 4. What are the conditions that cause precipitation? Write about the types of precipitation.
 5. Analyze the characteristics of cyclone and local weather.
 6. Examine the arid climate.
 7. Mention the link between climate and vegetation in detail.
 8. Define the humid tropical climate region. Mention the three tropical (A) climates and write about tropical rain forest climate (Af).
